Iowa Central Community College, Ft. Dodge

**Time: 10:00 AM to 1:00 PM**

Lunch provided

**RSVP today (888) 978-6889**

**Limited Seating Available**

We specialize in Farm and Light Industrial wind Turbines from 20 KW to 100 KW.

**Earth Linked Wind Solutions** is an award-winning wind energy firm providing Ag customers with long-lasting wind turbine electric generation equipment. Our unique 3-step process ensures a successful installation:

1. We prepare a detailed Project Plan including a site study, turbine sizing & height, pricing and a detailed financial analysis. This allows you to make an informed decision whether a wind turbine is right for you.
2. Our experienced Grant Writing Department prepares and submits applications for the federal and state grants proposed in the Project Plan. We have established an enviable success record with our grant applications.
3. Install wind turbine equipment on your site as proposed in the Project Plan.

With our experienced team of professionals we can often help you receive funding for up to 55% of the cost while reducing your energy expense for decades to come.
